

English does work - level 9

I was going to go on vacation, but the pandemic hit / Yo iba a ir de vacaciones, pero la pandemia llegó

Inglés

Hello, my name is Michelle and I want to welcome you to the third component of this course: English Does Work Level 9.

In this component, we are going to learn to tell stories from the past and how to structure them correctly in their beginning, their development and their ending.

For this, we must learn how to order and connect our ideas with help of transition words that tell us what happened before, simultaneously and later in the story, or even tell us what event concluded the story.

Also, to enrich our narration, we have some resources such as the expressions "was/were going to" and "was/were supposed to", that tell us about things that were expected to be carried out or that were planned in the past, but at the end will not be held in the future.

Finally, we are going to learn some pronunciation concepts that will improve our conversational skills.

Now, thanks for listening to me and let's start learning this new component.

Español

Hola, mi nombre es Michelle y quiero darles la bienvenida al tercer componente de este curso: English Does Work Nivel 9.

En este componente, vamos a aprender a contar historias del pasado y cómo estructurarlas correctamente en su inicio, su desarrollo y su desenlace.

Para esto, debemos aprender cómo ordenar y conectar nuestras ideas con la ayuda de palabras de transición, que en la historia nos dicen qué cosas ocurrieron anteriormente, simultáneamente y posteriormente en la historia, o incluso nos dicen qué evento concluyó la historia.

También, para enriquecer nuestra narración, tenemos recursos como las expresiones "was/were going to" y "was/were supposed to", que nos hablan de cosas que se esperaban que se llevaran a cabo o que se planificaron en el pasado, pero al final no se van a realizar en el futuro.

Por último aprenderemos algunos conceptos de pronunciación que mejorarán nuestras habilidades conversacionales.

Ahora, gracias por escucharme y comencemos a aprender de este nuevo componente.
